INTRODUCTION

The SMS+ Client is an easy way to send SMS to multiple mobile numbers including country code. With just a few clicks user can send SMS using the 'Send SMS' option. User can send text or flash or Unicode messages to customers, friends, office employees or relatives from anywhere in India without having any prior knowledge or special training for using the features provided in SMS+ client.

In Send SMS, there are three ways for sending SMS as follows:

- The Single SMS option provides the facility to send SMS to 100 mobile numbers
- Bulk SMS option provides the facility to send SMS by uploading text file containing mobile numbers including country code
- Group SMS option provides the facility to send SMS by adding contacts from groups or distribution list created in the 'Address Book'.

User is allowed to schedule SMS on a particular date and time. The entire scheduling and job execution is displayed in the 'Job Management' option. SMS+ Client lets the user create groups and distribution list and manage the contacts using the 'Address Book' option.

In Reports, user gets the detailed credit history using the 'Credit Details' option. Furthermore, the sent SMS log can be viewed in the 'SMS Report' option as well as exported in comma-separated format (.csv). The sent SMS summary can be viewed in the 'SMS Summary' option. The service also provides facility to manage user details in the 'User Profile' section.

Features:

- World-wide price based routing system
- Send text, Unicode and flash messages from PC to mobile numbers
- Facility to send SMS using multi-language characters (using Unicode messages)
- Fast Delivery
- Reports for viewing detailed information of sent SMS
- Unlimited storage of contact numbers in Groups and Distribution lists.
- Accurate DLR Report
- User friendly, does not require any prior knowledge

LOGIN

Login:

On account creation, user will receive a mail containing the URL of the SMS+ Client for sending messages. On visiting the link user will be shown the following page:

If user enters an incorrect username or password, user will be redirected back to the login page with an error message as shown below:-

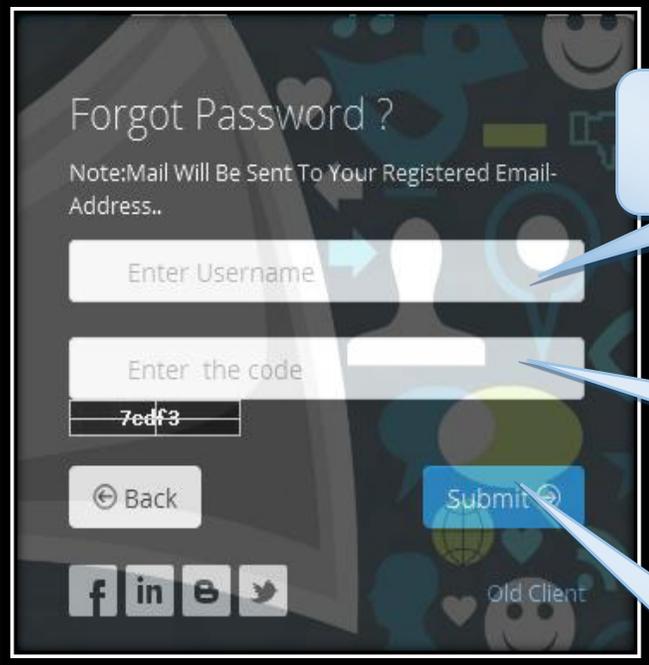

Forgot Password:

If user has forgotten or lost the account password, the user can recover by clicking on the 'Forgot Password' link provided on the login page.

After submitting the required details, user's password will be mailed on the email id provided by the user during account registration.

The screenshot shows a mobile application interface for password recovery. The title is "Forgot Password?". Below the title is a note: "Note:Mail Will Be Sent To Your Registered Email-Address..". There are two input fields: "Enter Username" and "Enter the code". The "Enter the code" field contains the text "7edf3". Below the input fields are two buttons: "Back" and "Submit". At the bottom, there are social media icons for Facebook, LinkedIn, Email, and Twitter, and a link for "Old Client".

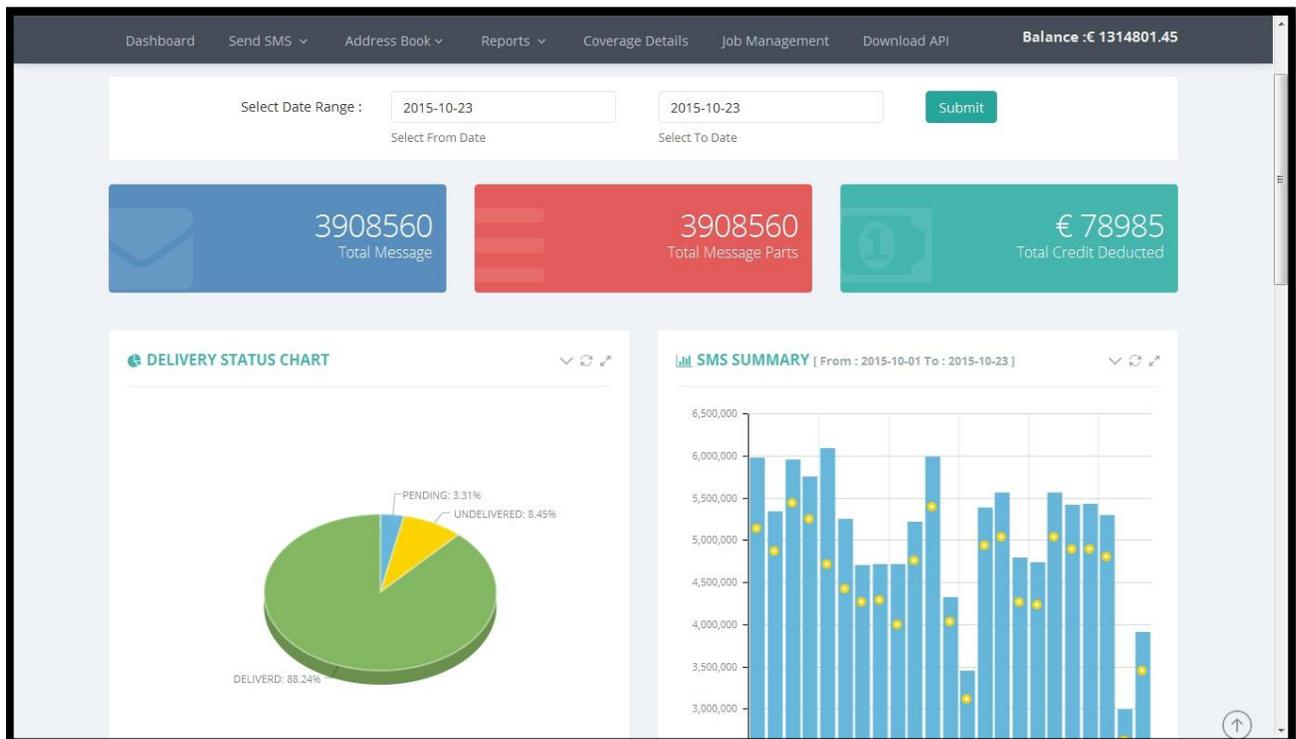

Callout boxes provide the following instructions:

- Enter username provided for SMS+ client account.
- Enter the code shown in the image below
- Click here to send the details and receive the password to the registered email-id.
- Click to close the pop-up window

Dashboard

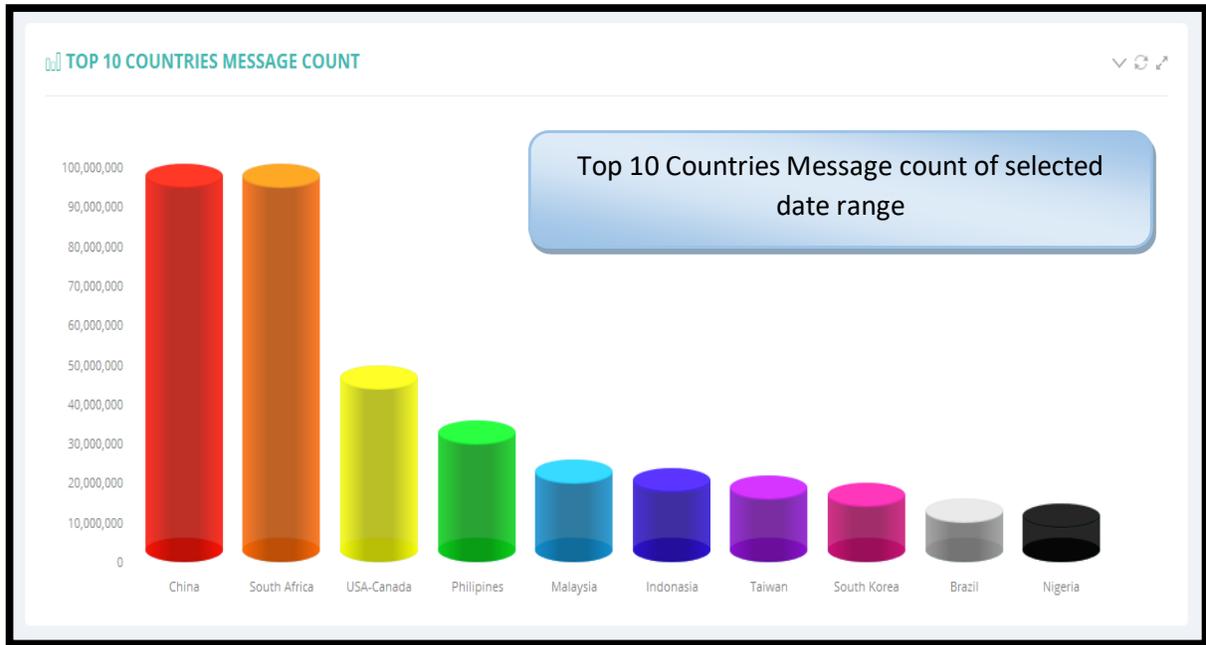

Dashboard allow you to select the 'From date and To date.' It will then display the desired results depending on the selected date range.

1. **Delivery Status Chart:** Delivery Status Chart will display the delivery status pie chart for the selected date range.
2. **SMS Summary:** SMS Summary report will display the graph of the current month.

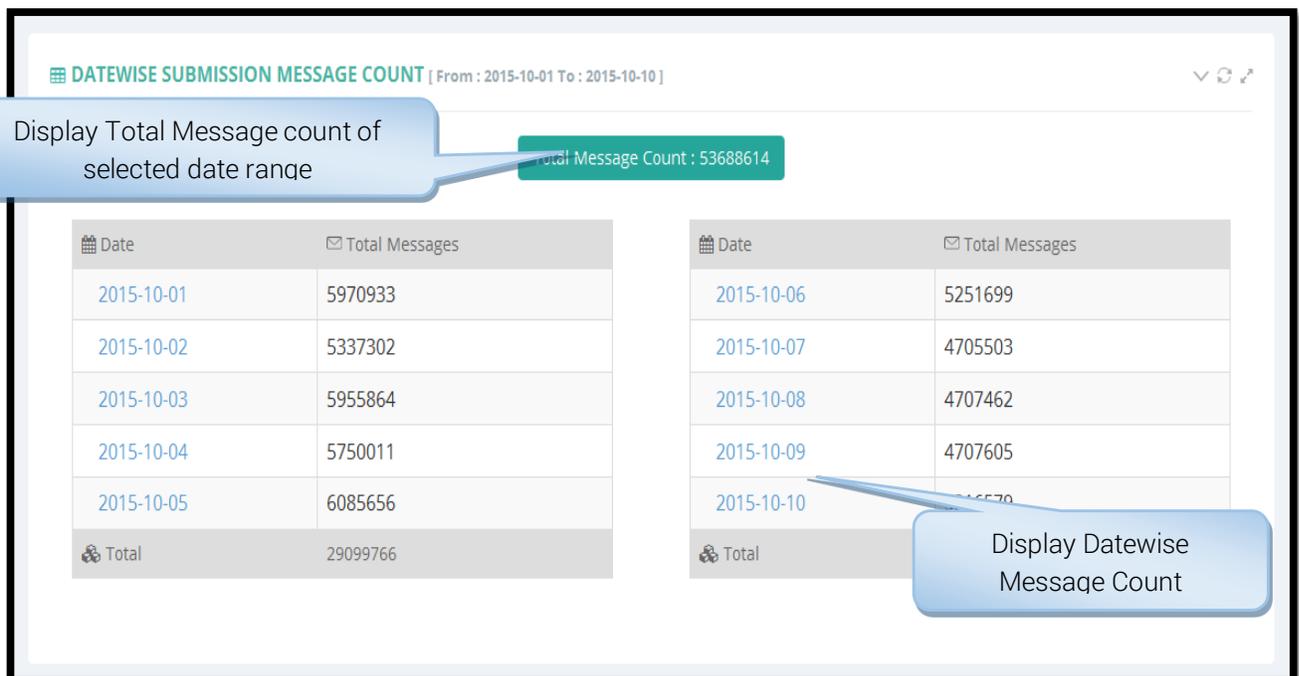

3. Top 10 Countries Message Count

Following window will display the 10 Countries Message count of selected Date range.

4. Date wise Submission Message Count

Following window will display the Date wise Message Count of selected Date range in Tabular format.

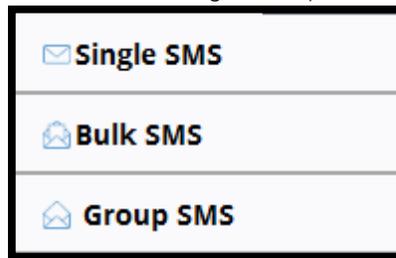

SEND SMS

The 'Send SMS' menu provides the ability to send messages through three different ways:-

1. **Single SMS:** Send SMS to any 100 mobile numbers including country code directly.
2. **Bulk SMS:** Used for sending messages, by uploading mobile numbers including country code, from a text file.
3. **Group SMS:** Used for sending messages to already defined groups or the distribution list in the address book.

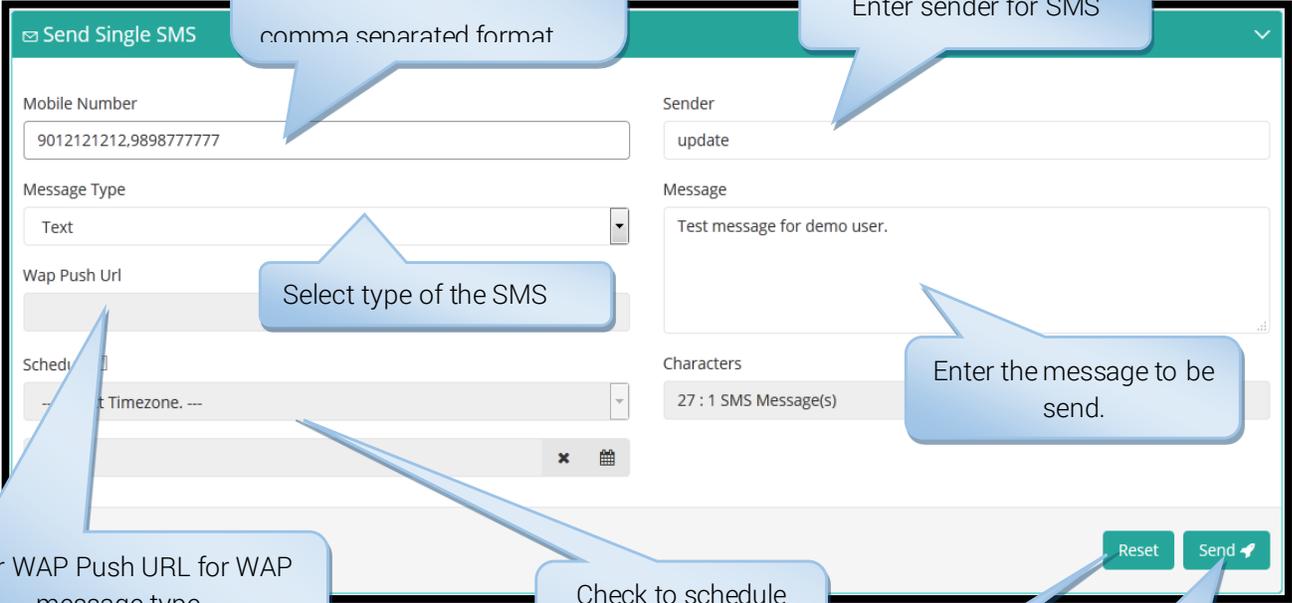

All the three ways provide the facility to schedule messages on a particular date and time.

We will discuss each in detail in the following sections.

Single SMS:

Single SMS option enables to send messages up to 100 mobile numbers including country code at the same time. Enter the mobile numbers including country code in a comma separated format. To send a message via Single SMS, the user needs to enter the mobile no(s), sender no, message type and message.

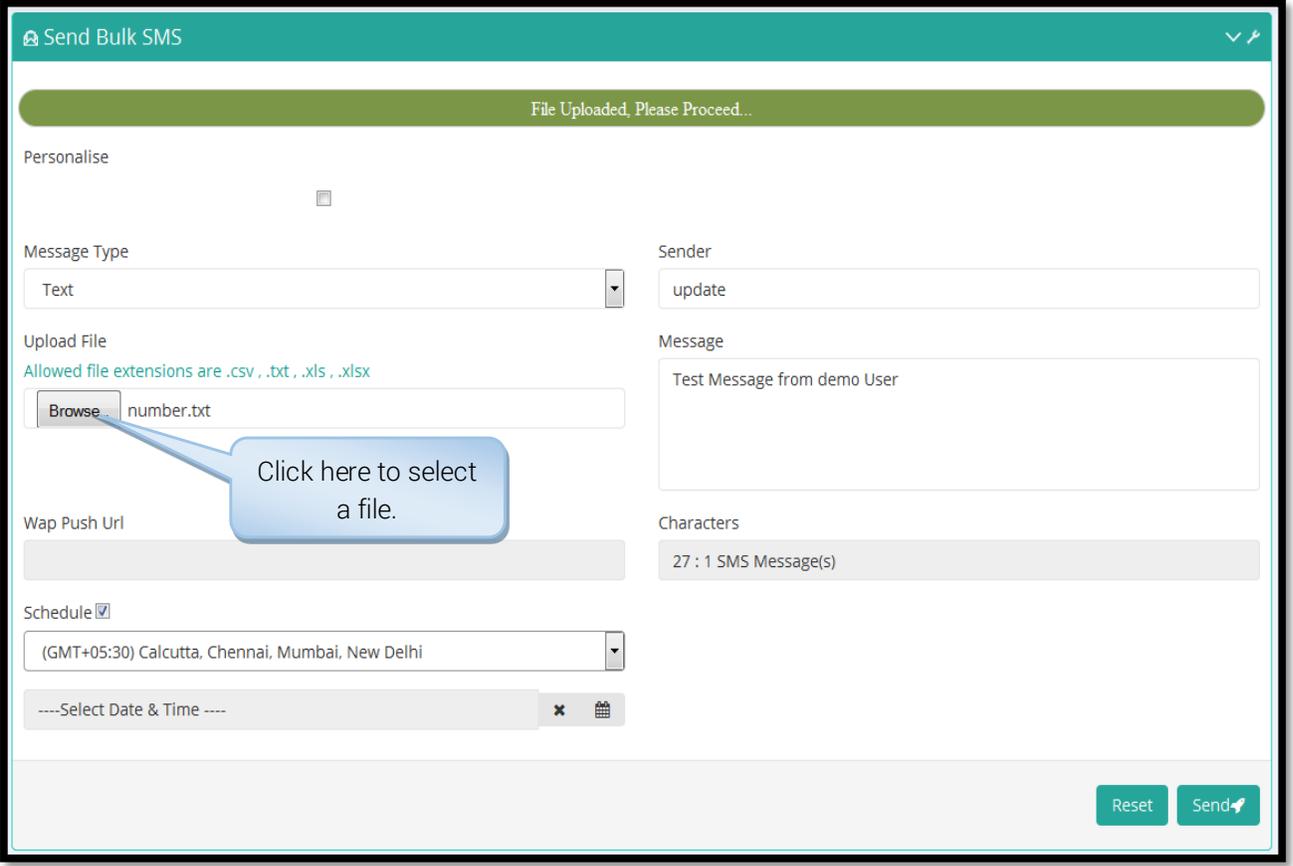

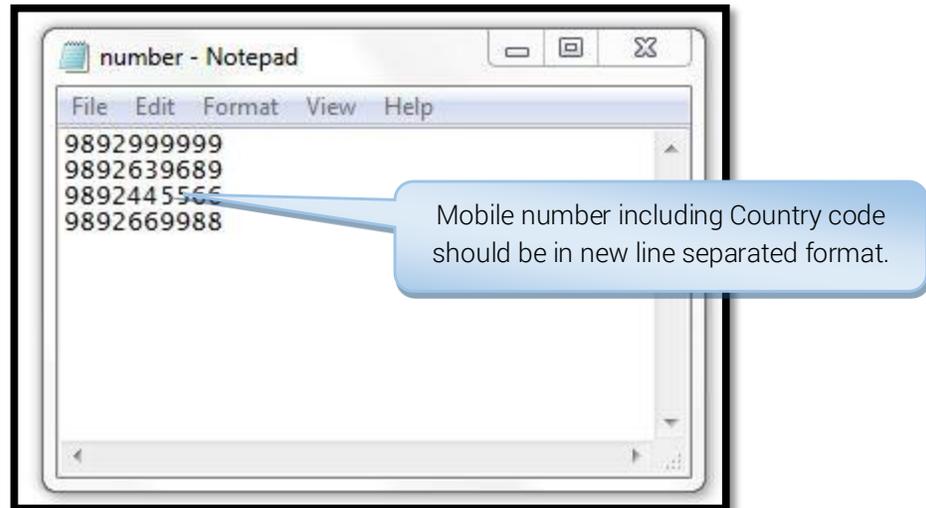

The screenshot shows the 'Send Single SMS' interface with the following fields and callouts:

- Mobile Number:** 9012121212,9898777777. Callout: "Mobile numbers including Country code should be in comma separated format".
- Message Type:** Text. Callout: "Select type of the SMS".
- Wap Push Url:** (Empty field). Callout: "Enter WAP Push URL for WAP message type".
- Sender:** update. Callout: "Enter sender for SMS".
- Message:** Test message for demo user. Callout: "Enter the message to be send.".
- Characters:** 27 : 1 SMS Message(s).
- Schedule:** (Checkbox) and Timezone: (Dropdown menu).
- Buttons:**
 - Reset: Callout "Click to clear all the fields."
 - Send: Callout "Click to send the SMS"

Bulk SMS:

Bulk SMS option provides facility to send SMS to multiple users just by selecting text the file (.txt) or comma-separated file (.csv) containing mobile numbers including country code in a line separated format as shown below:

Send Bulk SMS

File Uploaded, Please Proceed...

Personalise

Message Type: Text

Sender: update

Upload File: Allowed file extensions are .csv, .txt, .xls, .xlsx. Browse: number.txt

Message: Test Message from demo User

Wap Push Url

Characters: 27 : 1 SMS Message(s)

Schedule: (GMT+05:30) Calcutta, Chennai, Mumbai, New Delhi

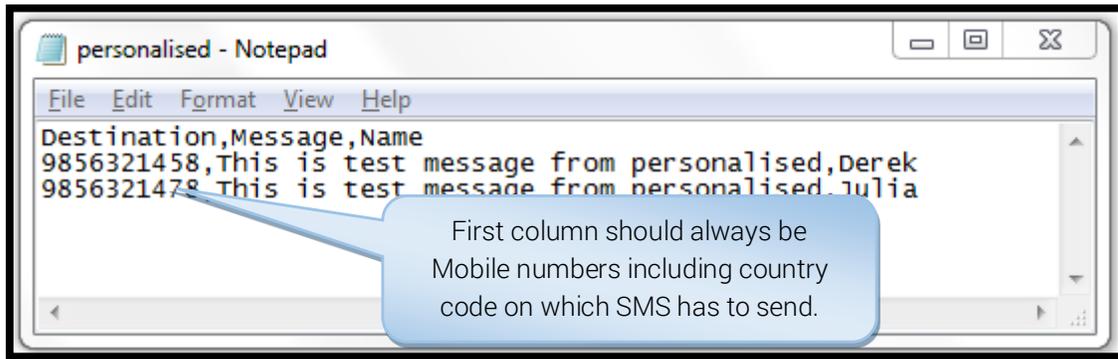

---Select Date & Time ---

Reset Send

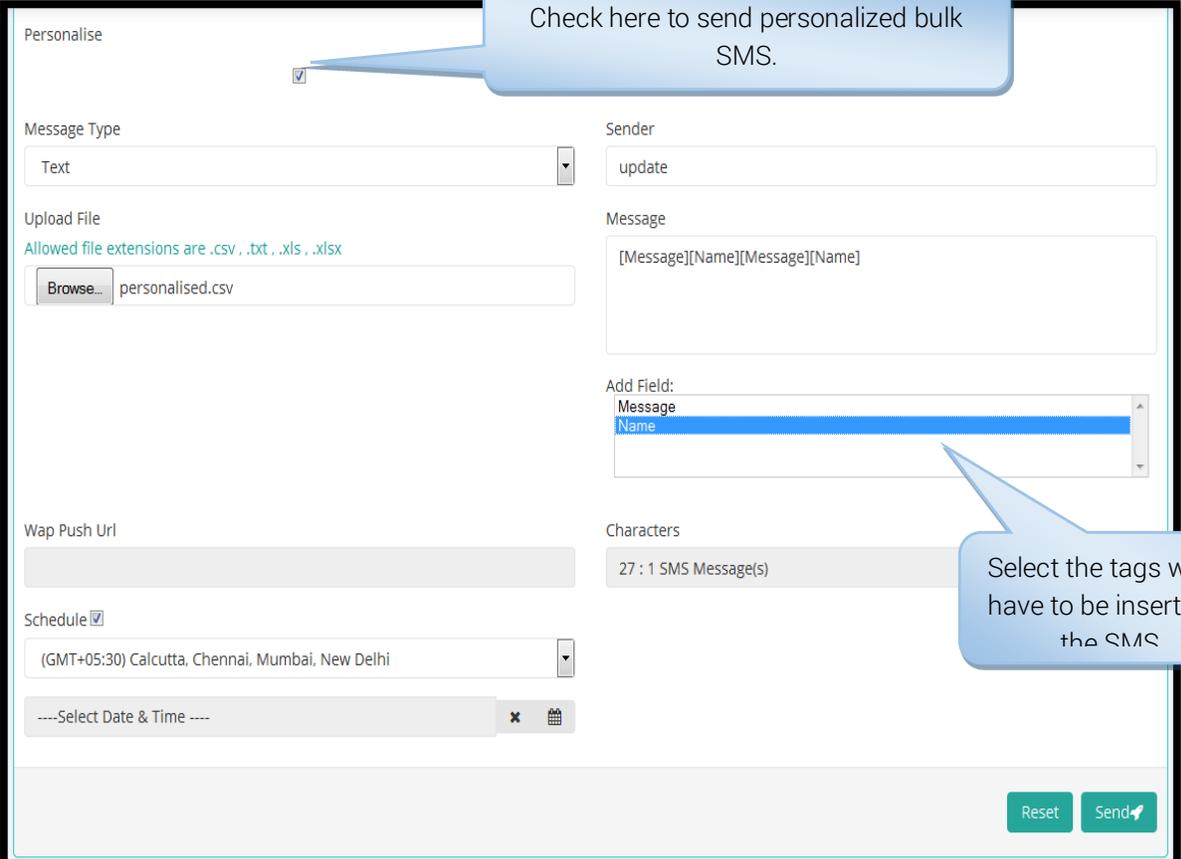

Click here to select a file.

Personalized Bulk SMS:

Bulk SMS also provides facility to send personalized SMS by selecting comma-separated (.csv) file in which the mobile numbers including country code must always be in the first column followed by the rest of the column, as shown below:

For sending Personalized Bulk SMS check the Personalize checkbox and enter sender, select message type and select the tags to compose the personalized message. Using personalized bulk SMS user can send SMS to maximum 10000 mobile numbers.

Personalise

Message Type: Text

Sender: update

Upload File: Allowed file extensions are .csv, .txt, .xls, .xlsx. File: personalised.csv

Message: [Message][Name][Message][Name]

Add Field: Message, Name

Wap Push Url: [Empty]

Characters: 27 : 1 SMS Message(s)

Schedule : (GMT+05:30) Calcutta, Chennai, Mumbai, New Delhi

----Select Date & Time ----

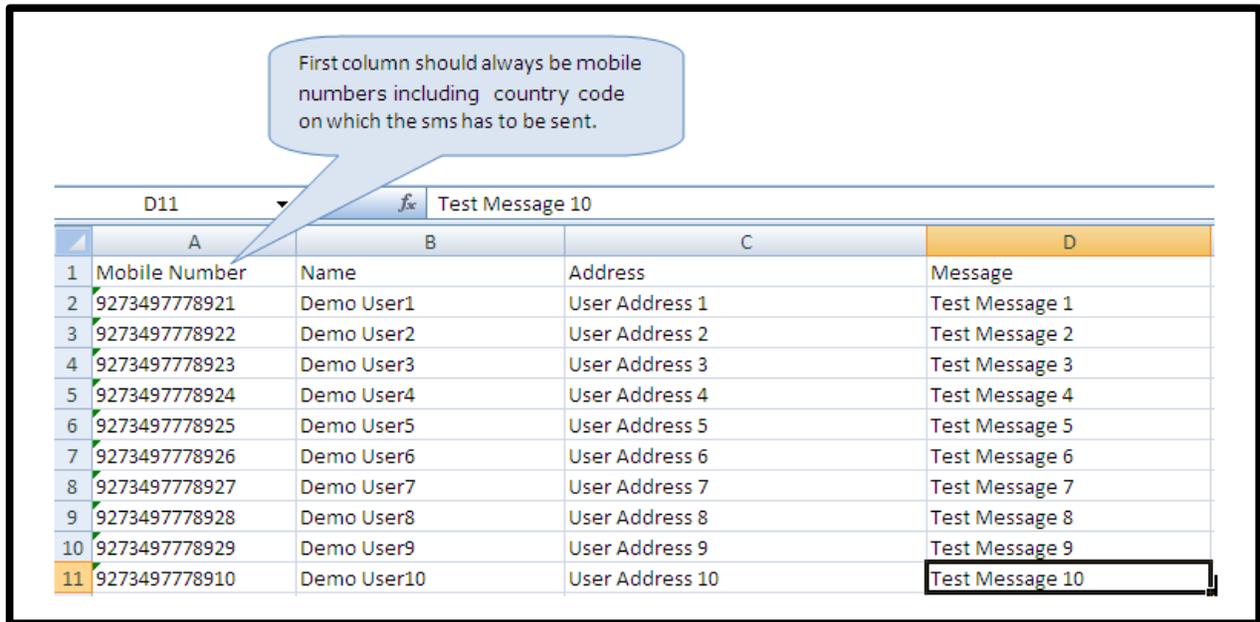

Reset Send

Check here to send personalized bulk SMS.

Select the tags which have to be inserted in the SMS

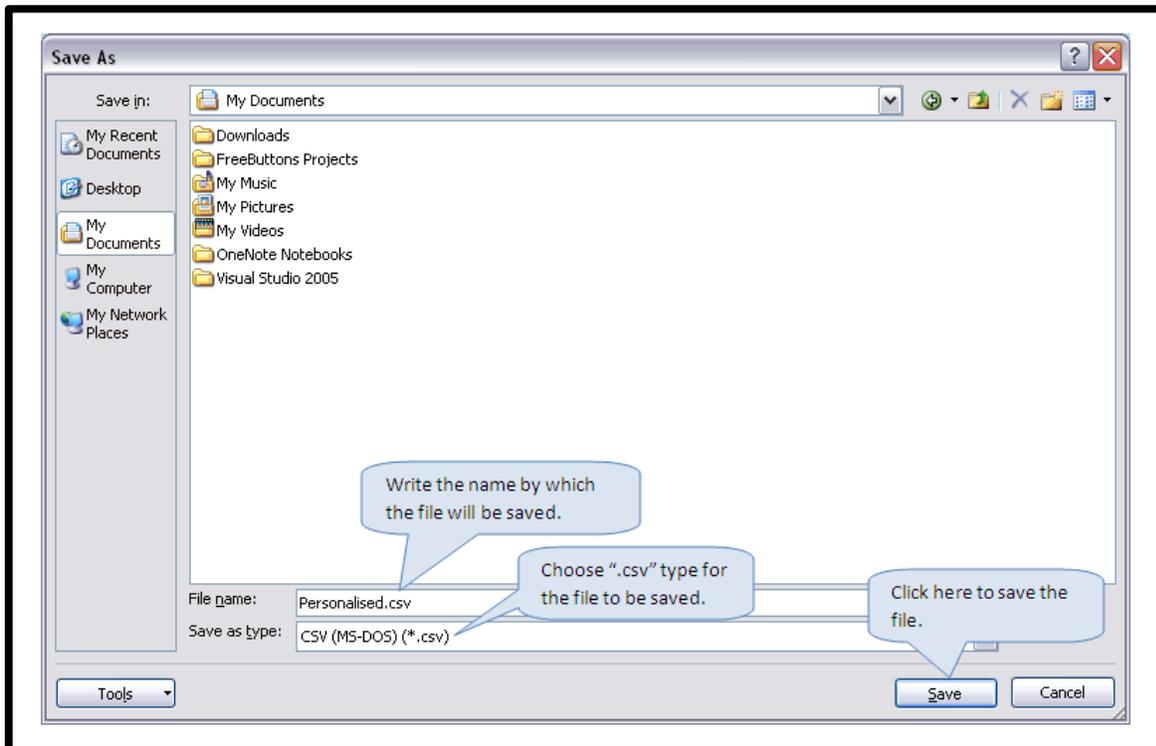

The user can create personalized file for different message type:

For TEXT Message: Create.csv file for Personalized Text/Flash Message Type.

	A	B	C	D
1	Mobile Number	Name	Address	Message
2	9273497778921	Demo User1	User Address 1	Test Message 1
3	9273497778922	Demo User2	User Address 2	Test Message 2
4	9273497778923	Demo User3	User Address 3	Test Message 3
5	9273497778924	Demo User4	User Address 4	Test Message 4
6	9273497778925	Demo User5	User Address 5	Test Message 5
7	9273497778926	Demo User6	User Address 6	Test Message 6
8	9273497778927	Demo User7	User Address 7	Test Message 7
9	9273497778928	Demo User8	User Address 8	Test Message 8
10	9273497778929	Demo User9	User Address 9	Test Message 9
11	9273497778910	Demo User10	User Address 10	Test Message 10

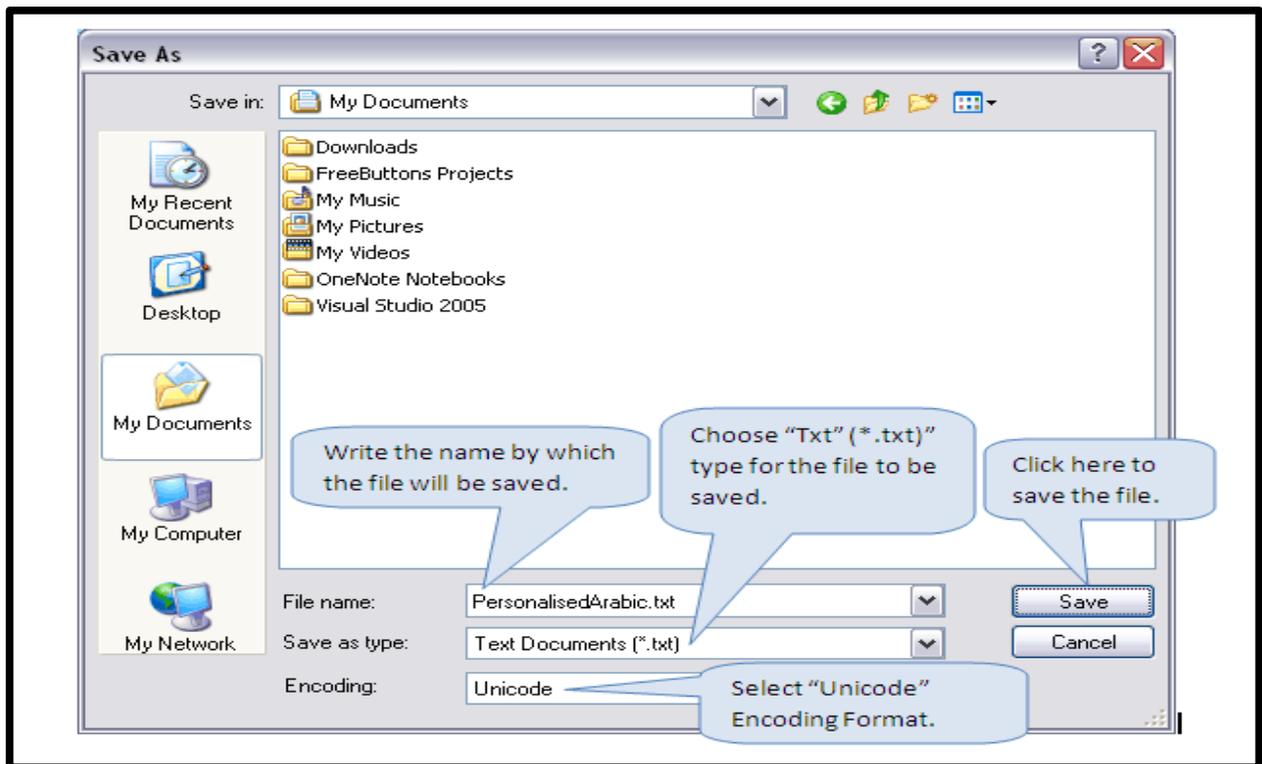

Save.csv file for personalized Text/Flash Message Type

For Arabic Message (.txt format): Create.txt file for personalized Arabic Message Type.

Save.txt file for personalized Arabic Message Type

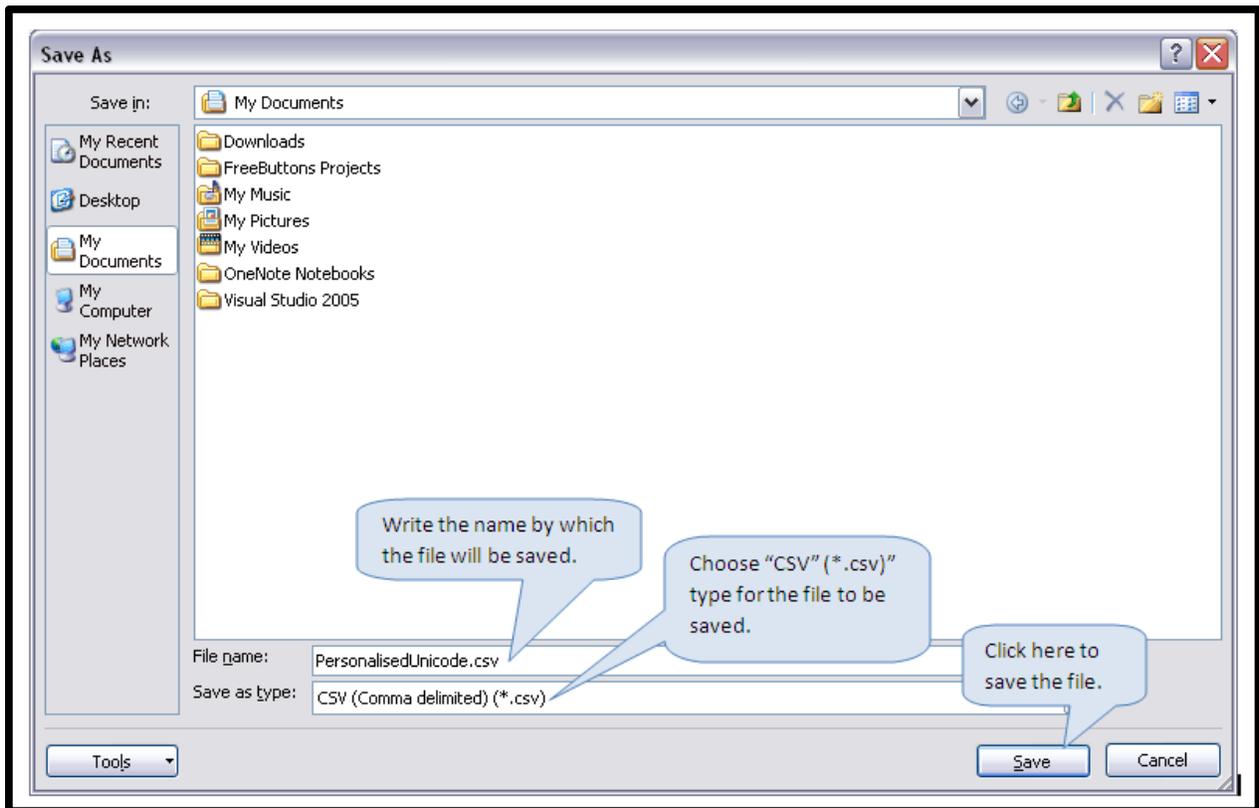

For Unicode Message: Create.csv file for personalized Unicode Message Type.

First column should always be mobile numbers including country code on which the sms has to be sent.

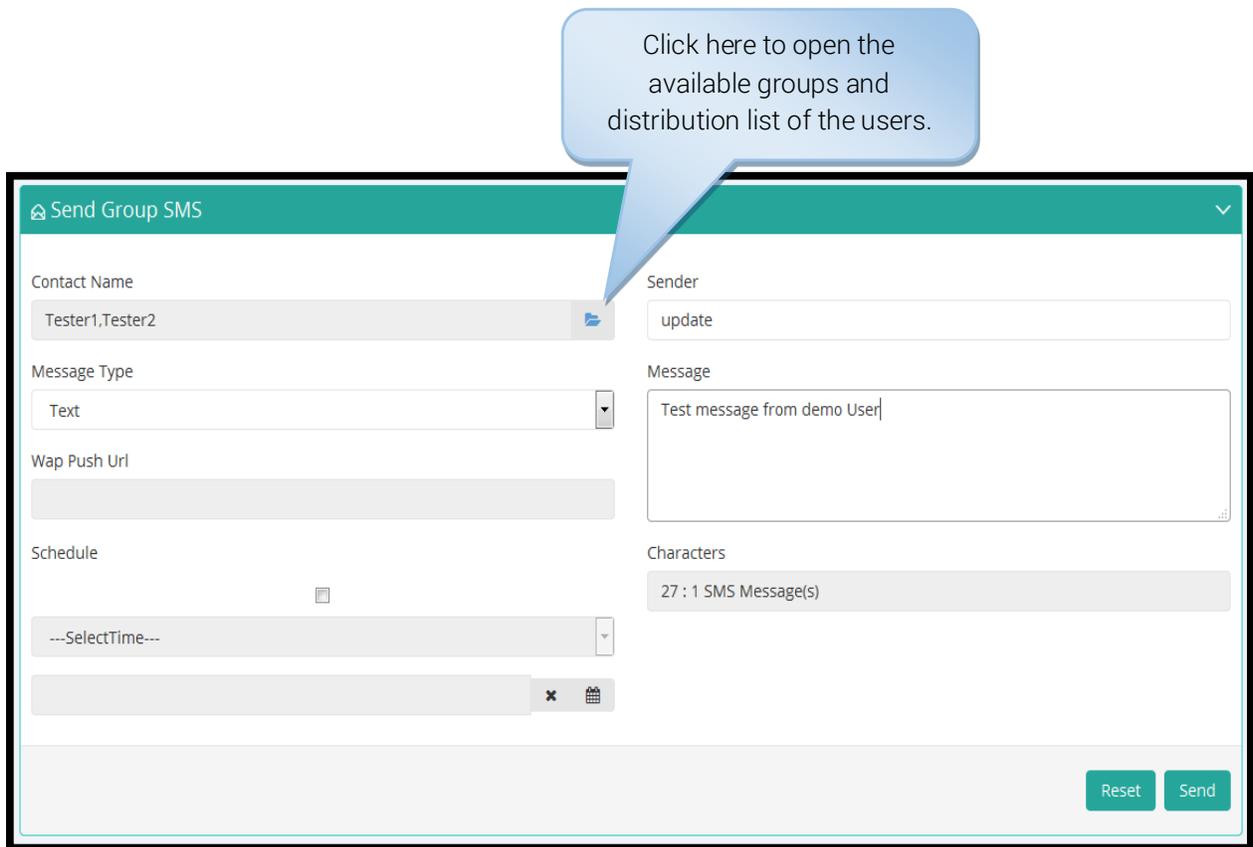

A	B	C
Number	Name	Address
46748979474	0044006F0072007200690073	004D0061006E00680061007400740061006E
49579759375	004D00610074006800650073	0041007500730074007200690061

Save.csv file for personalized Unicode Message Type.

Group SMS:

Group SMS provides facility to send message to the specific set of contacts. The working of Group is similar to that of Bulk SMS, only difference is that Group SMS takes mobile numbers including country code from the 'Address Book' in the form of 'Group or Distribution list.'

Click here to open the available groups and distribution list of the users.

Send Group SMS

Contact Name: Tester1,Tester2

Message Type: Text

Wap Push Url: [Empty field]

Schedule: ---SelectTime---

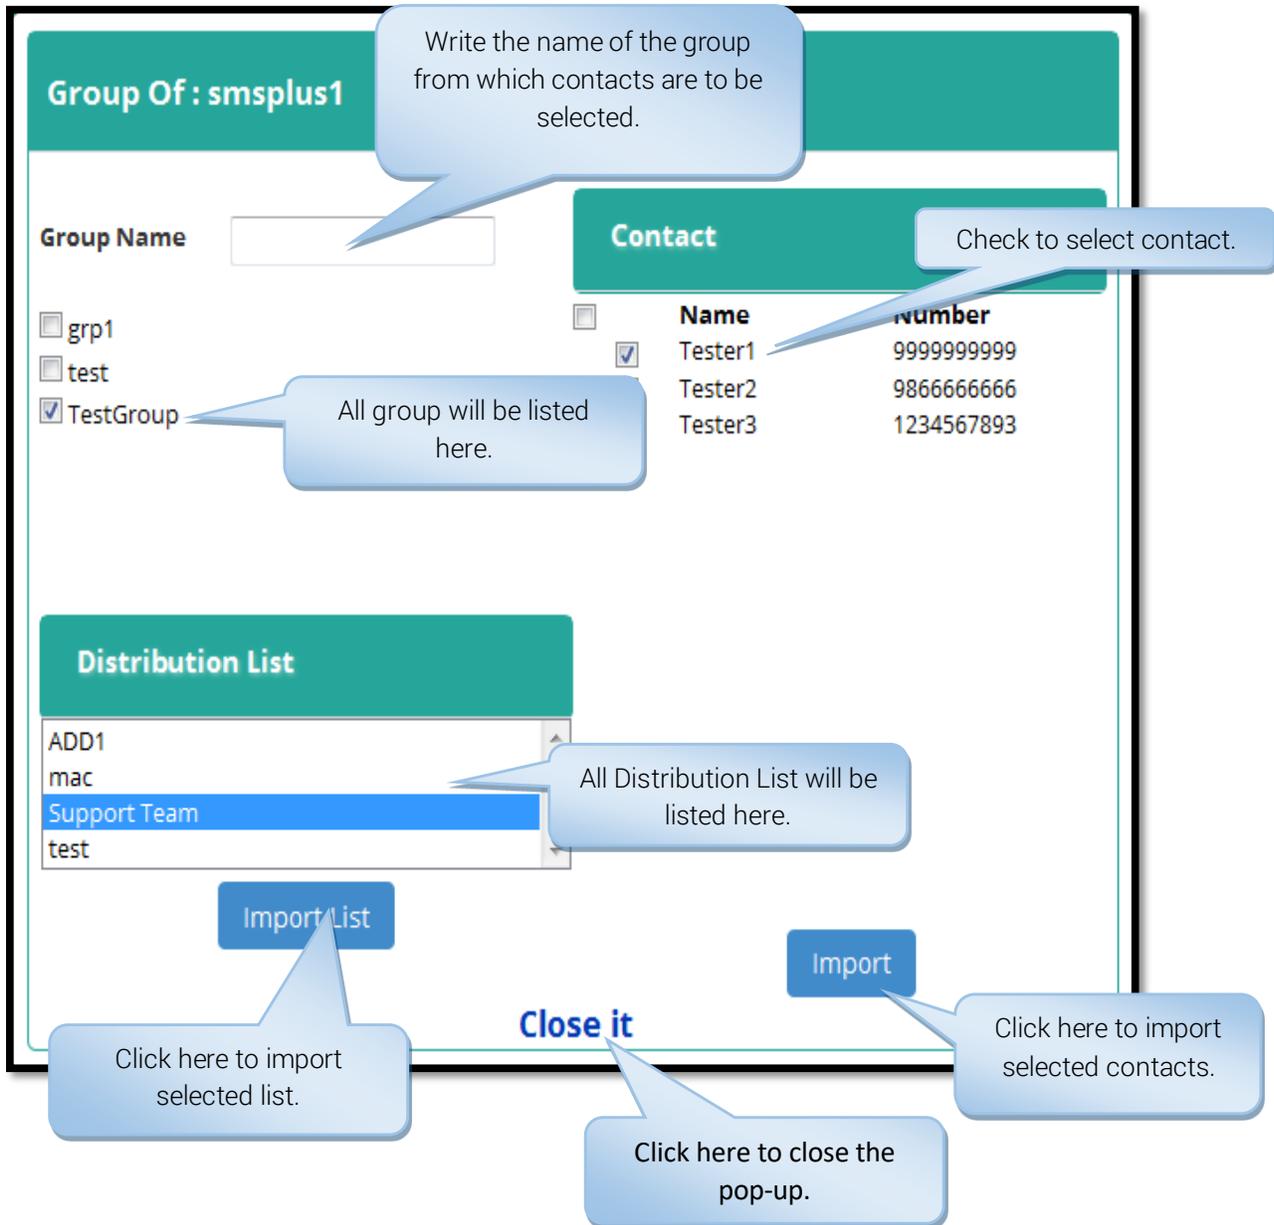

Sender: update

Message: Test message from demo User

Characters: 27 : 1 SMS Message(s)

Reset Send

Contact numbers can be selected by clicking the 'Import Contact Link' or by selecting a distribution list and clicking the 'Import List' Link.

The screenshot shows a web interface for importing contacts. At the top, a green header reads "Group Of : smsplus1". Below this is a "Group Name" input field. To the left, a list of groups is shown with checkboxes: "grp1", "test", and "TestGroup" (which is checked). A callout points to the "TestGroup" checkbox, stating "All group will be listed here." To the right, a "Contact" table is displayed with columns for "Name" and "Number". The table contains three rows: "Tester1" (9999999999), "Tester2" (9866666666), and "Tester3" (1234567893). A callout points to the "Tester1" row, stating "Check to select contact." Below the groups and contacts is a "Distribution List" section with a scrollable list containing "ADD1", "mac", "Support Team" (highlighted in blue), and "test". A callout points to the "Support Team" entry, stating "All Distribution List will be listed here." At the bottom, there are three buttons: "Import List", "Import", and "Close it". Callouts explain these buttons: "Click here to import selected list." for "Import List", "Click here to close the pop-up." for "Close it", and "Click here to import selected contacts." for "Import".

Write the name of the group from which contacts are to be selected.

Check to select contact.

All group will be listed here.

All Distribution List will be listed here.

Click here to import selected list.

Click here to close the pop-up.

Click here to import selected contacts.

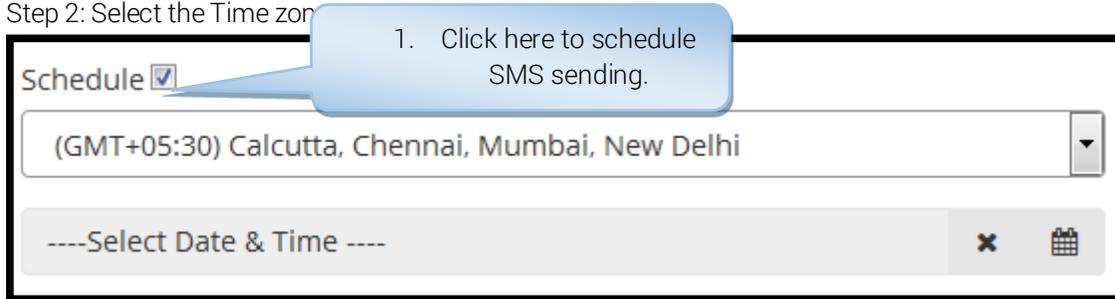

Scheduling SMS:

Scheduling SMS facility lets users schedule messages as per their preferred date and time. All the Send SMS modes provide SMS scheduling facility.

To Schedule SMS the following step have to be carried out:

Step 1: Check the Schedule checkbox.

Step 2: Select the Time zone

1. Click here to schedule SMS sending.

Schedule

(GMT+05:30) Calcutta, Chennai, Mumbai, New Delhi

----Select Date & Time ----

Step 3: Select the Time on the pop-up calendar.

Step 4: Select the Month & Year on the pop-up calendar.

Step 5: Select the Date on the pop-up calendar.

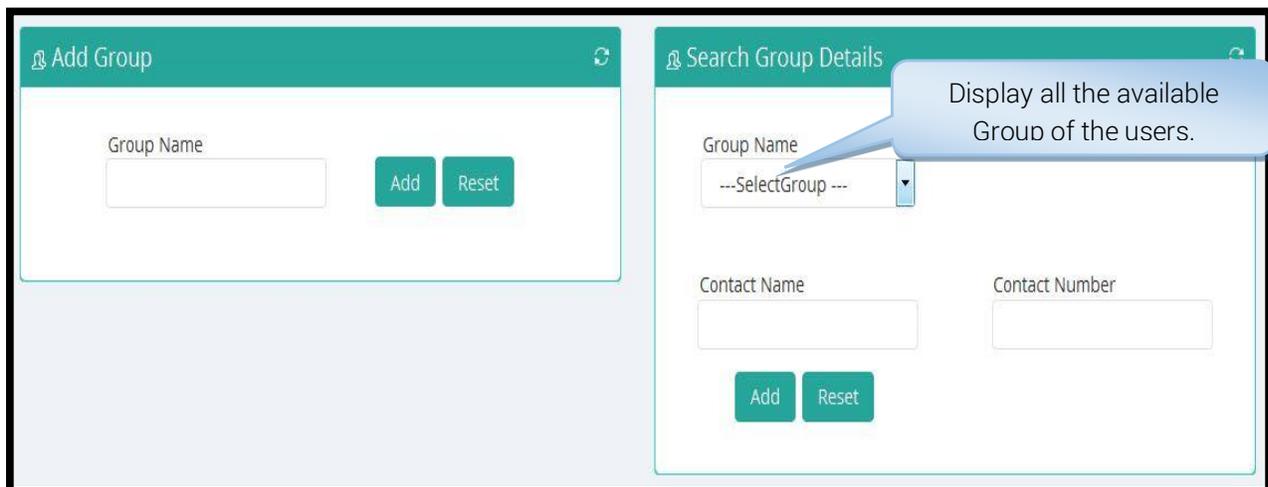

ADDRESS BOOK

Address Book provides the facility to save mobile numbers including country code. User can add, edit or delete mobile numbers saved in 'Groups'. User can add or delete mobile numbers saved in 'Distribution List'.

Group Management:

Using Groups, user can store mobile number including country code along with the name. Duplication of mobile numbers within a group is not permitted.

The screenshot shows two side-by-side screens. The left screen is titled 'Add Group' and has a 'Group Name' input field and 'Add' and 'Reset' buttons. The right screen is titled 'Search Group Details' and has a 'Group Name' dropdown menu, 'Contact Name' and 'Contact Number' input fields, and 'Add' and 'Reset' buttons. A callout bubble points to the dropdown menu with the text: 'Display all the available Group of the users.'

Add Group:

This section explains the process for creating a group.

Steps to add group:

1. Enter the name of the group which is to be created e.g. Office, Customers etc.
2. Click the 'Add' button to save the name for the group.

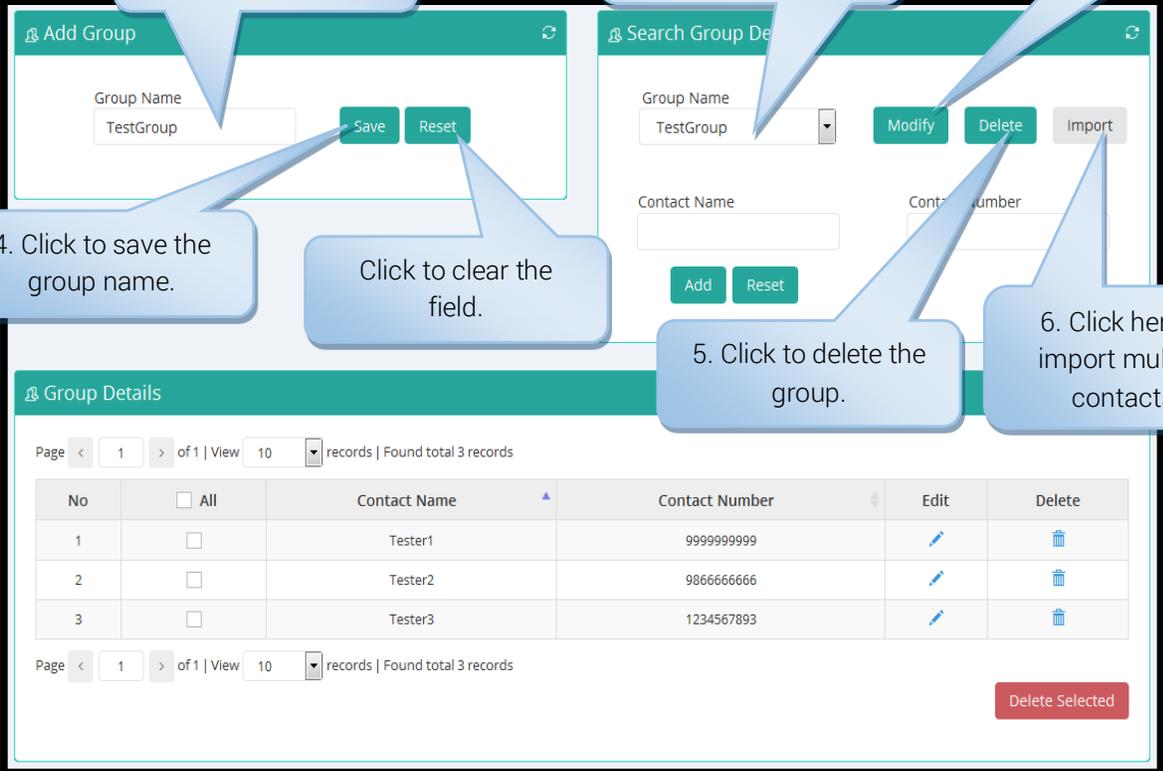

Modify and Delete Group:

This section explains the process for renaming and deleting a group.

Steps to add group:

1. Select the 'Group name' from the drop-down box which has to be renamed or removed.
2. Click the 'Modify' button to rename the selected group.
3. Enter the new group name.
4. Click the 'Modify' button to save the modified name for the group.
5. To remove the selected group click 'Delete' button and then click 'Yes' to confirm deleting the group.
6. To import contacts to the selected group click 'Import Contacts' this is explained in the next section.

The screenshot displays two main panels: 'Add Group' and 'Search Group Details'. The 'Add Group' panel has a 'Group Name' input field with 'TestGroup' entered, and 'Save' and 'Reset' buttons. The 'Search Group Details' panel has a 'Group Name' dropdown menu with 'TestGroup' selected, and 'Modify', 'Delete', and 'Import' buttons. Below these is a 'Group Details' table with 3 records. Callouts provide the following instructions:

1. Select the group to rename.
2. Click to modify the group name
3. Enter the new group name.
4. Click to save the group name.
5. Click to delete the group.
6. Click here to import multiple contacts.

The 'Group Details' table shows the following data:

No	<input type="checkbox"/> All	Contact Name	Contact Number	Edit	Delete
1	<input type="checkbox"/>	Tester1	9999999999		
2	<input type="checkbox"/>	Tester2	9866666666		
3	<input type="checkbox"/>	Tester3	1234567893		

At the bottom right of the table area, there is a red button labeled 'Delete Selected'.

Import Contacts:

This section will explain the process for importing multiple contacts. If mobile number already exists in a group while importing contacts then duplicate entry will be removed i.e. duplicate contact will be added only once in that group.

Steps to import contacts:

1. Enter the name and mobile number in a new line separated format.
2. Name and mobile number pair should be in comma-separated format.
3. Click 'Import' button to save the contacts to the selected group.

Address Book Import

Note :
All Contacts should be in a line separated format. Names should be without spaces E.g.
JoeSmith,1111
John,22222
. Names and Numbers within a contact should be comma(,)separated. For Ex: Name,Number You can Copy(Ctrl+C)-Paste(Ctrl+V) numbers from files.

TesterABC,9895568945
TesterPQR,9892369874

1. Enter contacts in new line separated format.

2. Name and number should be in comma separated format.

Import

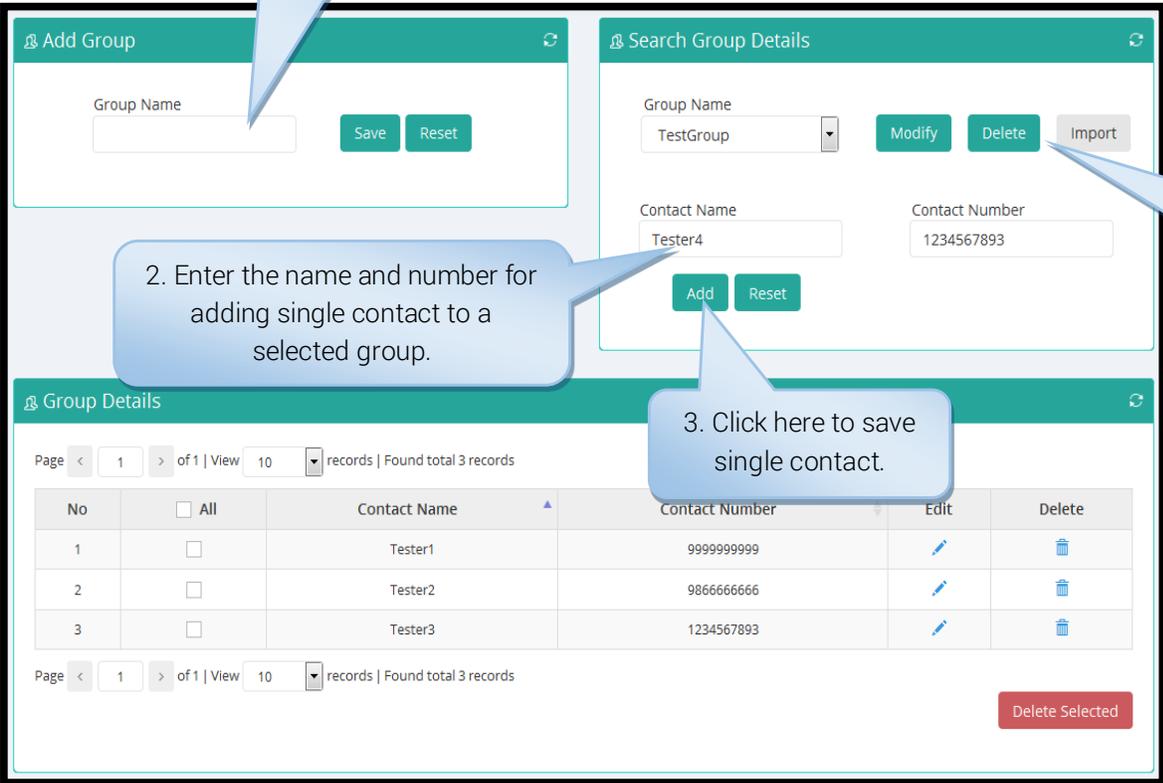

✕

Add Single Contact:

This section will explain the process for adding single contact. Existing mobile number cannot be saved in the same group.

Steps to import contacts:

1. Select the group name in which contact has to be added.
2. Enter the name and mobile number for adding single contact.
3. Click 'Add' button to save the contacts to the selected group.

1. Select the group

2. Enter the name and number for adding single contact to a selected group.

3. Click here to save single contact.

Click to clear the field.

The screenshot shows the following interface elements:

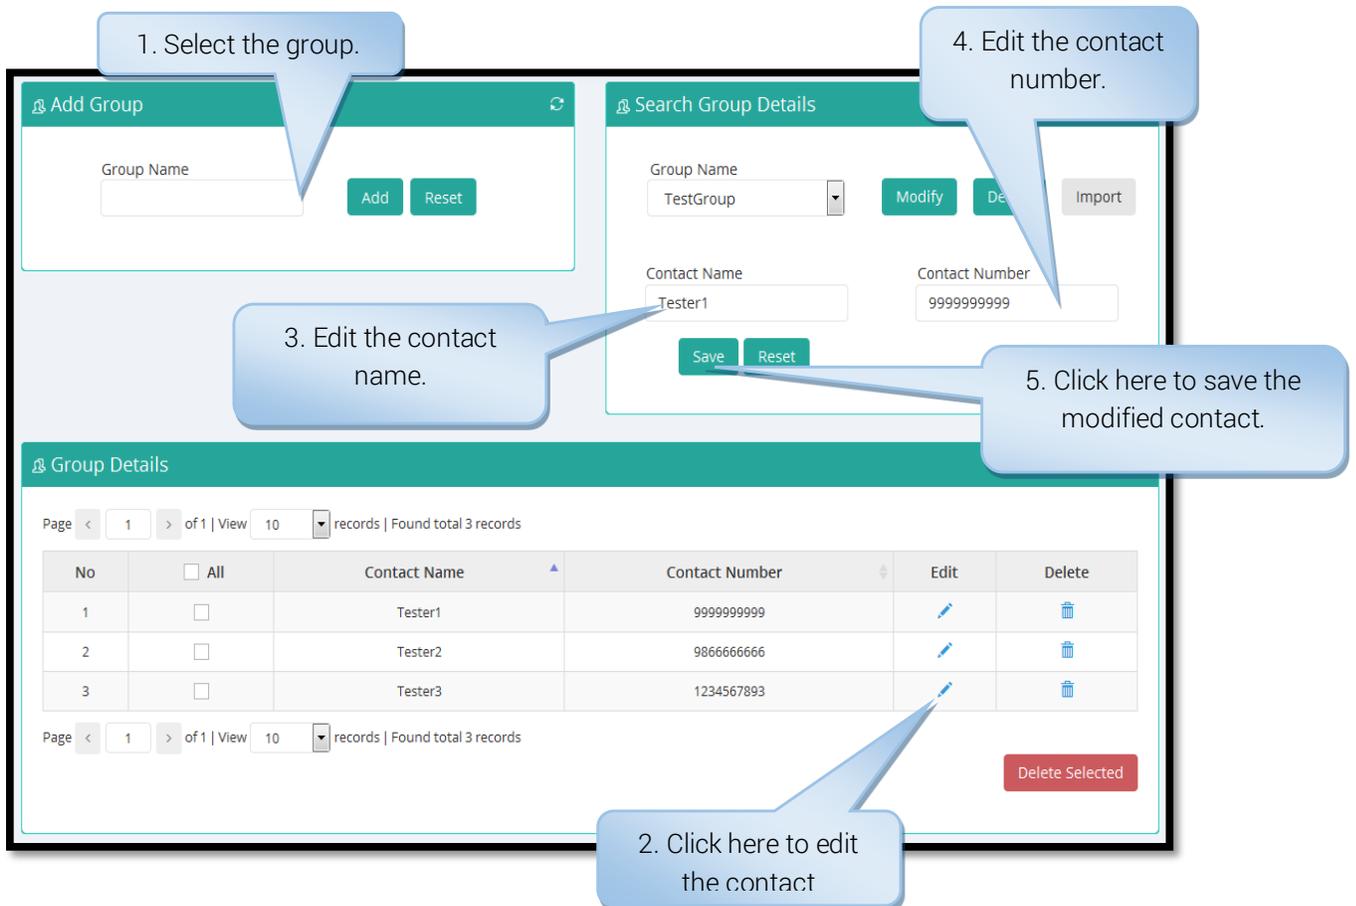

- Add Group:** A form with a 'Group Name' input field and 'Save' and 'Reset' buttons.
- Search Group Details:** A form with a 'Group Name' dropdown menu (set to 'TestGroup'), 'Modify', 'Delete', and 'Import' buttons. Below it, 'Contact Name' (Tester4) and 'Contact Number' (1234567893) input fields, and 'Add' and 'Reset' buttons.
- Group Details:** A table with columns: No, All (checkbox), Contact Name, Contact Number, Edit, and Delete. It lists three contacts: Tester1 (9999999999), Tester2 (9866666666), and Tester3 (1234567893). A 'Delete Selected' button is at the bottom right.

Edit Contact:

This section will explain the process for editing contact of the selected group.

Steps to editing contacts:

1. Select the group name in which contact has to be changed.
2. Select the contact by clicking the 'Edit' link beside the contact.
3. Edit the contact name.
4. Edit the contact mobile number.
5. Click 'Save' button to save the modified contact.

1. Select the group.

4. Edit the contact number.

3. Edit the contact name.

5. Click here to save the modified contact.

2. Click here to edit the contact

SMS Summary:

SMS Summary displays the date-wise sent SMS count and total price charged along with country-operator details for selected date range.

User can also view summary for particular country and operator by selecting them depending on user preference.

The screenshot shows the 'SMS Summary' interface with several callout boxes:

- Select Country.** points to the 'Country' dropdown menu.
- Select Operator.** points to the 'Operator' dropdown menu.
- Select Start Date.** points to the 'Date From' field.
- Select End Date.** points to the 'Date to' field.
- Click here to arrange by date, country, and operator** points to the 'Arrange By' section with radio buttons for Date, Country, and Operator.
- Click here to search SMS Summary Report** points to the 'Search' button.

The interface includes a 'Datewise' (selected) and 'Month-wise' radio button group. Below the filters, there are 'Date From' and 'Date to' fields, both containing '2015-10-26'. The 'Arrange By' section has radio buttons for 'Date', 'Country', and 'Operator'. A 'Search' button is located below the filters.

The results section shows a table with the following data:

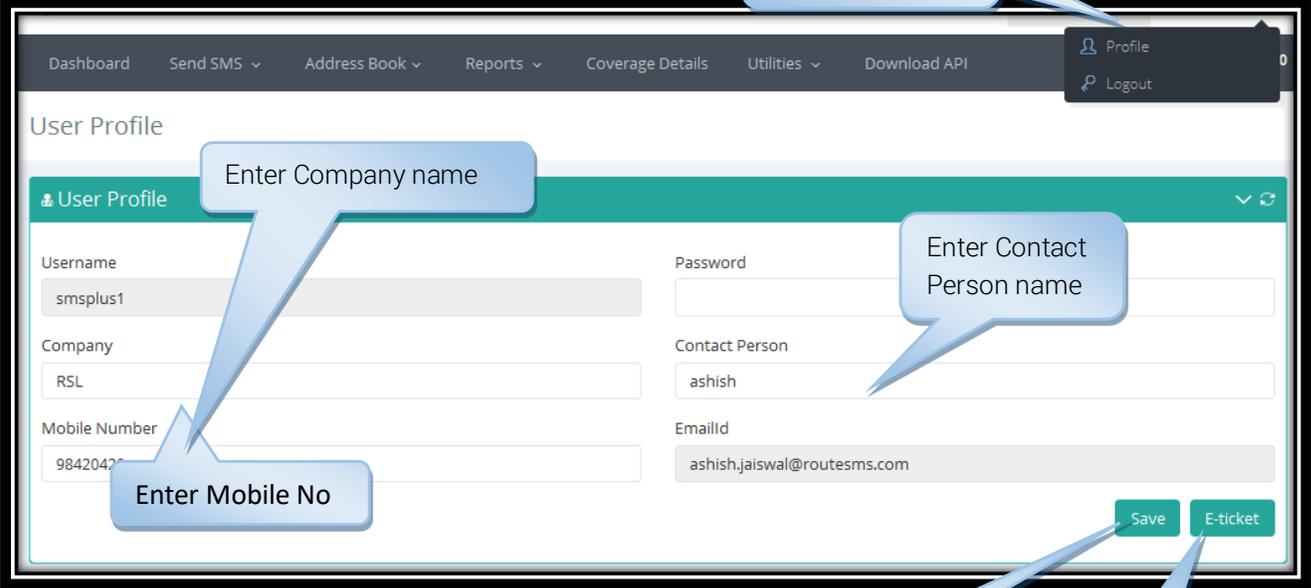

Country	Operator	Message	Message Parts	ChargePerSMS	Charge (€)
--	--	Total Messages: 7		Total Message Parts: 7	
1	2015-10-26	Afghanistan	Afghan Telecom	1	1
				0.00430	0.00000
					Total Charge: 0

At the bottom, there is a pagination control showing 'Page < 1 > of 1 | View 10 records | Found total 2 records'.

USER PROFILE

User Profile lets the user modify details like password, company, contact person, contact number and email id. All the details are mandatory.

To change password click the checkbox beside the new password field as shown below:

The screenshot shows the 'User Profile' form in a web application. The form contains the following fields and buttons:

- Username:** smsplus1
- Company:** RSL
- Mobile Number:** 98420427
- Password:** (empty field)
- Contact Person:** ashish
- EmailId:** ashish.jaiswal@routesms.com
- Buttons:** Save, E-ticket

Callouts point to the following elements:

- Top right: Click here to see the User Profile.
- Company field: Enter Company name
- Mobile Number field: Enter Mobile No

JOB MANAGEMENT

Job Management option displays details of the jobs uploaded by the user from 'Send SMS,' along with other information it displays status of the uploaded jobs.

Status can be any one of the following:

- Waiting: Job is ready for execution.
- In Process: Message sending is in progress.
- Partially Completed: Indicates partial completion of Job.
- Scheduled: Indicates job is scheduled for execution.

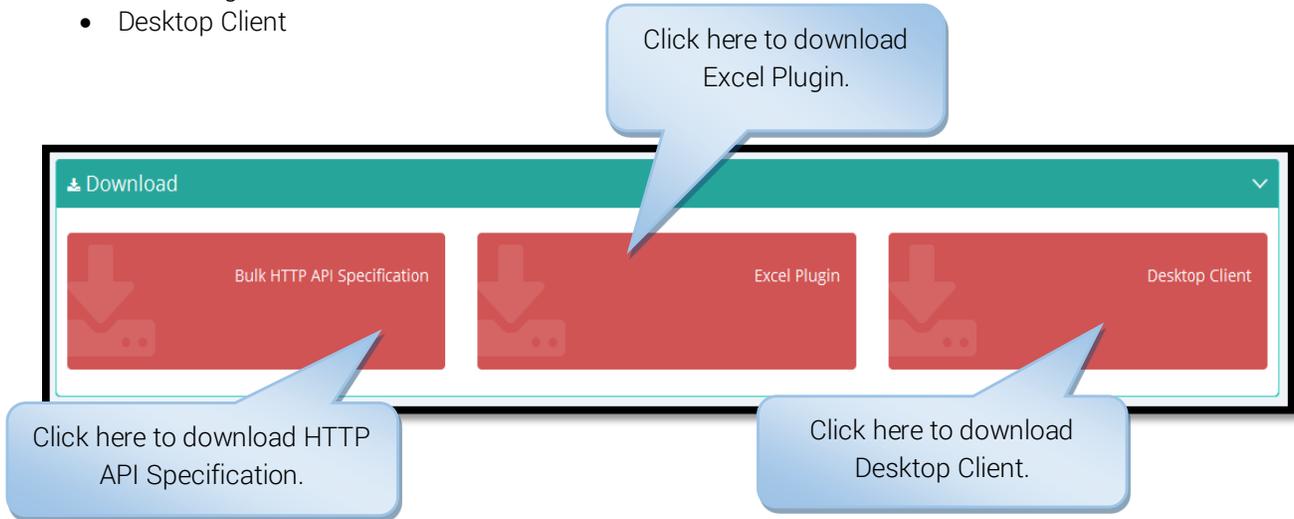

The screenshot shows the 'Job Management' interface. At the top, there are search filters for 'Message' and 'Sender'. Below these are date filters for 'Date From' and 'Date to'. A 'Reset' button and a 'Search' button are located at the bottom right of the filter section. Below the filters is a 'Job Management Reports' section with a table of job records. Callouts provide instructions: 'Enter message details to search for a particular job' points to the Message field; 'Enter Sender to search for a particular job.' points to the Sender field; 'Select Start Date.' points to the Date From field; 'Select End Date.' points to the Date to field; and 'Click here to search a job.' points to the Search button.

No	Message	Sender	Type	Length	Sent	Total Destination	Upload Time	Scheduled Time	BeginTime	CompletionTime
1	Hello		Text	12	0	3	2015-10-26 15:43:33	NA	NA	NA

Download API
