Overview

The proposed system serves as a solution to add the Add-Ins to MS-Excel-2003 and MS-Excel-2007 with the name SMSPlus which allows the user to send SMS to list of Mobile Numbers with specified messages which are present in an Excel sheet.

When user is using this system, user can send SMS to specified range of mobile numbers present in different columns of worksheet. In this system user can send messages in the form of Unicode messages & flash messages. Here user is provided with the facility of converting a message to Unicode form and user can write an Arabic message too.

This system provides the facility of scheduling of messages i.e. when to send the messages to specified mobile numbers; user can specify the time and date for scheduling.

In this system user can view the reports for "Job Management, Reports, User Profile, and Coverage Details" for login user.

Steps to run an Excel Add-In Setup:

- 1. Click the first .exe File: "Setup". Then one will see the installation interface.
- 2. First it will ask to install 3 to 4 components that are required for excel add in to run.
- 3. Then Follow the below steps:

⊮ SmsPlusExcelSetup	
Welcome to the SmsPlusExce	ISetup Setup Wizard
The installer will guide you through the steps require computer.	ed to install SmsPlusExcelSetup on your
